

Corn Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain corn acreage, yield, and production estimates. The table reveals the estimate provided in each and the number of states for which individual state estimates are to be published.

All 48 States will publish estimates for acreage planted in March and June, and 41 States will publish estimates for acreage harvested for grain in June. Thirty three of these States are designated as “full program” which means they will publish individual State production forecasts during August through November. During the production forecast season 8 States will be combined into an “All Other State” total grain production for each forecast month. The 6 New England States and Nevada do not publish estimates of corn for grain, only corn for silage.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>

Soybean Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain soybean acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Soybean acreage planted estimates will be published in 31 states in March, and acreage planted and for harvest estimates will be published in 31 States in June. Twenty-nine of these states are designated as “full program” which means they will publish individual State production forecasts during August through November. During the production forecast season 2 States will be combined into an “All Other States” total production for each forecast month.

Upland Cotton Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain cotton acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Upland cotton acreage planted estimates will be published in 17 states in March and June. Fifteen of these states are designated as “full program” which means they will publish individual State production forecasts during August through January and May. During the September through December production forecast season 2 states will be combined into an “All Other States” total production for each forecast month. In August, January, and May individual state estimates of production will be included in the report for these 2 States. Four States, California, Arizona, New Mexico, and Texas, remain in the full estimating program for American-Pima cotton.

All Hay Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain all hay acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

All hay acreage for harvest estimates will be published in 48 states in March and June. The first all hay state level production estimate will be published in the January *Crop Production Annual Summary*. Alaska estimates will be published as a separate table in the *Crop Production Annual Summary*, and not included in the US total.

Alfalfa Hay Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain alfalfa hay acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Alfalfa Hay acreage for harvest estimates will be published in 42 states in June. Twenty-nine of these states are designated as “full program” which means they will publish individual states production forecasts in August and October. During the production forecast season 13 states will be combined into an “All Other States” total production for each forecast month. The first All Hay state level production estimate will be published in the January *Crop Production Annual Summary*.

Durum Wheat Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain durum wheat acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Durum Wheat acreage planted estimates will be published in 6 States in March, and acreage planted and for harvest estimates will be published in 6 States in June. Four of these states are designated as “full program” which means they will publish individual States production forecasts in July through September. California and Arizona begin their production forecasts in May, Montana and North Dakota begin production forecasts in July. During the production forecast season 2 states, Minnesota and South Dakota, will be combined into an “All Other States” total production for each forecast month.

Oats Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain oat acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Oat acreage planted and for harvest estimates will be published in 28 States in March and June. Seventeen of these States are designated as “full program” which means they will publish individual States production forecasts during July and August. During the production forecast season 11 States will be combined into an “All Other States” total production for each forecast month. Alaska estimates will be published as a separate table in the *Crop Production Annual Summary*, and not included in the US total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>

Proso Millet Reports - Annual Commodity

This table identifies National Agricultural Statistics Service (NASS) releases that contain proso millet acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Proso Millet acreage planted and harvested estimates will be published in 3 States in June. State level estimates will be published for these three States annually. Estimates of planted and harvested acres, yield, and production would only be published during the *Crop Production Annual Summary*. The published U.S. total is a 3 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
<i>Acreage</i>	June	Planted Acres	3	-	3

Pilot Forage Reports - Annual Commodity

This table identifies National Agricultural Statistics Service (NASS) releases that contain forage acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Forage acreage and for harvest estimates will be published in 7 States. State level estimates will be published for these seven States annually. Estimates of harvested acres, yield, and production would only be published during the *Crop Production Annual Summary*. The published U.S. total is a 7 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
<i>Crop Production Annual Summary</i>	January	Harvested Acres	7	-	7
		Yield	7	-	7
		Production	7	-	7

If the forage pilot project is successful, plans are to expand the forage program to more States. Acreage for forage includes both traditional hay crops (i.e. alfalfa) and small grain crops, provided they are harvested as haylage or greenchop (removed from the field before it is dried).

Peanut Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain peanut acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Peanut acreage planted estimates will be published in 9 States in March, and acreage planted and harvested estimates will be published in 9 States in June. These 9 States are designated as "full program" which means they will publish individual States production forecasts during August through November. The published U.S. total is a 9 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>

Sugarcane Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain sugarcane acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Four States will publish sugarcane acreage for harvest estimates in June. These four States are designated as "full program" which means they will publish individual States production forecasts during August through December, February and March. The published U.S. total is a 4 State total.

1/ Estimates are published for Sugar, for Seed, and for Sugar and Seed.

2/ Florida only.

Sugar Beets Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain sugarcane acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Sugar Beet acreage planted estimates will be published in 12 States in March, and acreage planted and harvested estimates in June. These 12 States are designated as "full program" which means they will publish individual States production forecasts during August through November. The published U.S. total is a 12 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>

Rye Reports - Annual Commodity

This table identifies National Agricultural Statistics Service (NASS) releases that contain rye acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Rye acreage planted and for harvest estimates will be published in 4 States in June, and eleven other States would be combined into an "All Other States" total. State level estimates will be published for four States annually and eleven other States would be combined into an "All Other States" total. Estimates of planted and harvested acres, yield, and production would only be published in the *Small Grains Summary* and the *Crop Production Annual Summary*. The published U.S. total is a 15 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
<i>Acreage</i>	June	Planted Acres	4	11	15

		Harvested Acres	4	11	15
		Yield	4	11	15
		Production	4	11	15

Canola Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain canola acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Two States will publish individual canola acreage planted in March, and acreage for harvest estimates in June. Fifteen other States will be combined into an "All Other States" estimate. During the production forecast season the same two States are designated as "full program" which means they will publish individual State level production forecasts in October, while sixteen other States will be combined into an "All Other States" estimate. The published U.S. total is a 17 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
<i>Prospective Plantings</i>	March	Planted Acres	2	15	17
<i>Acreage</i>	June	Planted Acres	2	15	17

		Yield	2	15	17
		Production	2	15	17
<i>Crop Production Annual Summary</i>	January	Planted Acres	2	15	17
		Harvested Acres	2	15	17
		Yield	2	15	17
		Production	2	15	17

Sunflower Reports

This table identifies National Agricultural Statistics Service (NASS) releases that contain sunflower acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Seven States will publish individual sunflower acreage planted in March, and acreage for harvest estimates in June. Seventeen other States will be combined into an "All Other States" estimate. During the production forecast season the same seven States are designated as "full program" which means they will publish individual State level production forecasts in October, while seventeen other States will be combined into an "All Other States" estimate. The published U.S. total is a 24 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			State	Annual	
			<u>Level</u>	<u>States</u>	<u>U.S.</u>
<i>Prospective Plantings</i>	March	Planted Acres	7	17	24
<i>Acreage</i>	June	Planted Acres	7	17	24

		Harvested Acres	7	17	24
		Yield	7	17	24
		Production	7	17	24

Flaxseed Reports - Annual Commodity

This table identifies National Agricultural Statistics Service (NASS) releases that contain flaxseed acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Flaxseed acreage planted and for harvest estimates will be made in 4 States in June. State level estimates will be published in the four States annually. Estimates of planted and harvested acres, yield, and production would only be published in the *Crop Production Annual Summary*. The published U.S. total is a 4 State total.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
<i>Acreage</i>	June	Planted Acres	4	-	4

<i>Crop Production Annual Summary</i>	January	Planted Acres	4	-	4
		Harvested Acres	4	-	4
		Yield	4	-	4
		Production	4	-	4

Safflower Reports - Annual Commodity

This table identifies National Agricultural Statistics Service (NASS) releases that contain safflower acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Safflower acreage planted and for harvest estimates for 13 States will be combined into a U.S. estimate in June. Estimates of planted and harvested acres, yield, and production would only be published in the *Crop Production Annual Summary*.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
<i>Acreage</i>	June	Planted Acres	-	-	13

Rapeseed Reports - Annual Commodity

This table identifies National Agricultural Statistics Service (NASS) releases that contain rapeseed acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Rapeseed acreage planted and for harvest estimates for 6 States will be combined into a U.S. estimate in June. Estimates of planted and harvested acres, yield, and production would only be published in the *Crop Production Annual Summary*.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
<i>Acreage</i>	June	Planted Acres	-	-	6

<i>Crop Production Annual Summary</i>	January	Planted Acres	-	-	6
		Harvested Acres	-	-	6
		Yield	-	-	6
		Production	-	-	6

Mustard Seed Reports - Annual Commodity

This table identifies National Agricultural Statistics Service (NASS) releases that contain mustard seed acreage, yield, and production estimates. The table reveals the estimates provided in each and the number of states for which individual state estimates are to be published.

Mustard seed acreage planted and for harvest estimates for 5 States will be combined into a U.S. estimate in June. Estimates of planted and harvested acres, yield, and production would only be published in the *Crop Production Annual Summary*.

<u>Name of Publication</u>	<u>Month</u>	<u>Estimates Published</u>	<u>States to be Published</u>		
			<u>State Level</u>	<u>Annual States</u>	<u>U.S.</u>
